

**Please join us as Team ALARM
(A Lot of Awesome Robot Makers)
Competes in two
FIRST Robotics Massachusetts Regional events**

Where and When: WPI Regional
Worcester Polytechnic Institute
Saturday, March 13, 9:00am – 6:00pm

Boston Regional
Boston University's Agganis Arena
Saturday, March 25, 9:00am – 6:00pm

Both Events are FREE

Come watch us compete in this year's FIRST Robotics game "Breakaway!"

In six weeks, we designed and built a robot to kick soccer balls, climb over a bump, to self-elevate, and to work with and against other robots at the competitions.

The competition atmosphere is often described as "a rock concert that meets the Super Bowl mixed with science and technology."
FIRST is a unique experience for participants and attendees alike.

What is FIRST?

FIRST (For Inspiration and Recognition of Science and Technology) is an international organization that uses a sports-like competition to get students interested in science, technology and engineering. It teaches everything from mechanical and electrical engineering to teamwork and leadership. Check out -

<http://www.usfirst.org/>.

Team ALARM works alongside adult mentors to build a robot in a six-week timeframe. Our team knows how exciting and rewarding science and technology can be. ALARM students work to develop problem solving skills and teamwork as we design, build, and operate robots to meet the year's engineering challenge.

How to Participate: Join us in the seats and cheer for Team 2079 ALARM, take a tour of the pit areas, talk with the students, and see masterfully engineered robots

Come experience the compelling spirit and energy these young innovators deliver! You will enjoy every moment, and get a special glimpse of our future as a Nation.
